PROFESSIONAL PROFILE

Full Stack developer with experience in Front End and Back End development. My technical skills include the use of JavaScript, React, Redux, NodeJS, Express, Sequelize, PostgreSQL, HTML, CSS, agile methodologies, Git, and data structure.

I am practical, organized and I have an agile learning which allows me to be productive when creating dynamic, efficient and attractive web applications. I value good communication and the possibility of continuous learning that allows me to grow and succeed in the projects in which I participate.

English level: A2 +.

PROJECTS

Full Stack Web Developer - Countries

March. 23 - April. 22

Academic experience.

Henry Bootcamp, Cordoba, Argentina.

Design and development of a Web Application about countries around the world. It allows you to search for countries using their name. When selecting the country, information such as the name, its flag, its capital, its continent and other relevant data is displayed.

You can create a tourist activity for the countries, it also contains orders and filters by different criteria such as alphabetically ascending or descending, by amount of population, by continents and tourist activities.

Front: React, Redux

Back: Node, Express

Base de datos: PostgreSQL y Sequelize.

Full Stack Web Developer - Salvando Huellas

April. 23 - May. 23

Academic experience.

Henry Bootcamp, Cordoba, Argentina.

Design and development of a Web Application for a Canine Shelter, in this application you can generate an adoption request for the different dogs that are in the shelter. You can view them through the different filters such as size, age and sex. In addition, the application has an e-commerce, a donation section, user registration and administrator management, among other features.

Front: React, Redux

Back: Node, Express

Base de datos: PostgreSQL y Sequelize.
